Name: Tajruba Tahsin Nileema

ID: 18.02.04.079

Name: Rushmia Ahmed

ID: 18.02.04.080

Project Description

This project is about to make an app that will help people to plan their wedding in a perfect way. In a wedding, couple and their families have to face many difficulties while arranging all the necessary things for the wedding. For that reason, they fail to enjoy the wedding ceremony of their loved ones properly. To get rid of this difficulty, they need a professional wedding planner. This app is an wedding planning app. This app will reduce the difficulties of the couple and their families.

Android Version Selection

We would like to use the Andriod Version 7.1.1(nougat) or 8.0(oreo), because they can help our app to reach atleast 66.2% or 60.8% of users.

Project Functionality and Key Features

- 1.Sign up-** If the user doesn't have any account, then they have to open an account in our app.
- 2.Log in-** To plan his/her wedding perfectly, at first he/she will log in.
- 3.Forgot Password-** If the customer/user forgets her/his password then they can retrieve their account by using this option.
- 4.Homepage-** A homepage where we will show other sectors of the app.
- 5.Decoration-** In this portion, we will upload the pictures of our previous works(related to wedding). If the customer/user likes one of our previous works,they can select from this portion, If they have requirements, then they have to contact us through chat option.
- 6.Food-** In this portion, there will be many food items. Customer/user has to select item from there and has to give us the amount of guests.
- 7.Clothes Designing-** In this portion, bride and groom can see our previous works. They can choose from there. And for their requirements, they have to talk to the designer through chat option.
- 8.Parlour-** In this portion, both bride and groom can choose their weeding look. They can chat with the beautician.

9. Photography- In this portion, the couple can choose the photographer to capture their lovely moments by watching the previous works of our photographers.

10.Chat- In this portion, customers/users can contact with the wedding planners at any time to tell their requirements.

11.Google Map- In this portion, our main office location will be shown in the google map.

What's New

In a wedding, couples have to rush about decoration, food, clothes designing and photography. But they can get all this at once by using this app. They will be trouble free and can enjoy their wedding properly.
